Subject: RE: Checking on Possible Meeting Date

I do think a call might be helpful. We could spend about 45 with you, if that's OK, and "bridge the gap" between where we were in 2015 and where we are now. Would sometime next few weeks work for you? Patrice replied to me separately on meeting dates, too. She suggested the 20th or 22nd. The 20th works perfectly for me; how does your schedule look? She also offered to hold the meeting at their facility if that would be convenient for other parties. Once I hear back from you, I'll write the three of you again with a proposed date, and I'll include Sheryl Kunickis as well, since we have done so in the past.

Thank you, and have a good weekend,

Bernalyn

Hey Bernalyn,

Thanks for offering to catch me up on the Task Force's recent activity. The last time I was at

meeting with your group, there was a presentation on IMS in 2015. Before that, I recall a CDL pixel expansion presentation. Given how long ago that was, if you think an introductory call would be helpful, we can set up one. Regarding a joint meeting, I'm thinking availability will be dictated more by the Services' schedule as they are in the middle of drafting their BiOps.

Phil –

I am not sure how familiar you are with where FESTF is with current data development activities, but I would be glad to update you in light of Anita's advice below and our hope to be on your agenda for a meeting with the agencies in June, when they jointly meet on FIFRA/ESA matters. Would an introductory call be helpful to that end, to catch you up on what FESTF has provided and what we are working on?

I look forward to communicating with you – thank you,

Bernalyn

Hi Bernalyn,

I'm starting a one-year detail in mid-June as Acting Deputy Director of the Biological and Economic Analysis Division. In my absence, Phil Villanueva, a branch chief in EFED, will be coordinating the ESA-related activities. Regardless, I'd still be interested in attending the meeting, but will leave the planning logistics to Phil, Patrice, and Cathy. Thanks for reaching out.

Best,

Anita

Hi Anita –

I am following up on the request below. I know there is still a great deal of uncertainty, but if staff time allows, we'd still like to try to meet with you in June. FESTF has made significant progress on several fronts: (1) the concept of voluntary conservation pilots that we talked to you about at the beginning of this year; (2) completion of species data aggregation under the direction of FWS; and (3) revamping the FESTF old IMS into a more modern software tool which is much more responsive to current data and review needs related to FIFRA and ESA assessment.

Let me know if you think June might work, and if so what dates might look good. If it is not possible to coordinate a meeting of the kind we've had before with several of your staff also in attendance, we'd be happy to have a smaller meeting with those of you copied here. Thank you,

Bernalyn

Hi Bernalyn,

Folks are swamped right now trying finish up draft BEs for carbaryl and methomyl as well as draft BiOps for the 3 pilot Ops. Sorry to keep putting this meeting off – perhaps early June would be best. Cathy/Patrice – what do you think?

Subject: Checking on Possible Meeting Date

Anita –

We discussed a possible meeting with the agencies to update you on FESTF data and the new IMS development, and you suggested that we try later in the spring due to current workloads. We do have an FESTF member meeting in DC in March, and the morning before that could be an option – March 22. Any chance a meeting on that morning might work? If not, that's fine – we can certainly plan for a later date.
